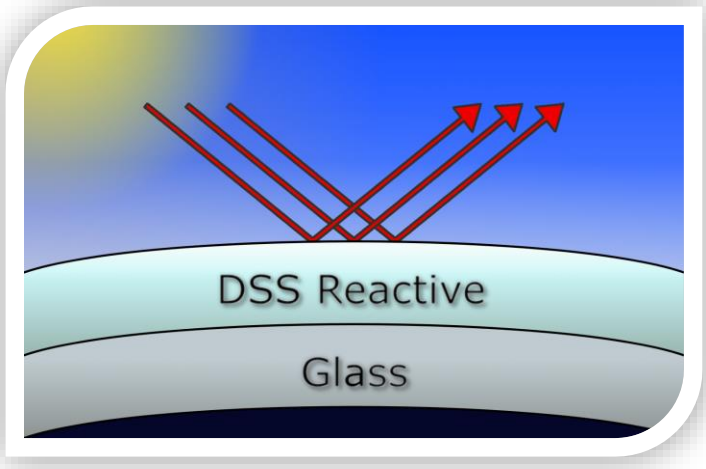
DSS Reactive Pro

NEW Product from
Micro MED/ Diamond Seal Systems

DSS Reactive is a photo-reactive nanotechnology coating that is used on exterior glass surfaces and solar panels. It keeps glass stronger and more brilliant, adding a long-lasting shine. It makes it harder to scratch and reduces micro-abrasions.

The DSS Reactive product breaks down hydrocarbons, dirt, organic matter, and other contaminants thanks to its photo-catalytic properties. The glass surface becomes hydrophilic, therefore water just sheets off the substrate. DSS Reactive will not chip, crack, stain, pit or discolor the surface. The glass or solar panel becomes much easier to maintain; with just a rinse, the glass looks clean from dust and other organic contaminants. Used on many architectural surfaces, such as metal, glass, granite, and solar panels.



- DSS Reactive uses energy from the sun to break down hydrocarbons and clean the surface while reflecting any damage from UV rays.

Diamond Seal Systems offers the best in nanotechnology coatings for architectural surfaces. Our products offer peace of mind and protection for your investment. Surfaces will be harder, smoother, and longer lasting, as well as much easier to maintain.

DSS Reactive main features:

- Cures itself deep into the glass, creating a permanent, impenetrable barrier against harmful elements.
- Neutralizes germs through a photo-catalyst reaction.
- Adds durability and increases hardness rating of the surface.
- Decomposes hydrocarbons, supporting self-cleaning.

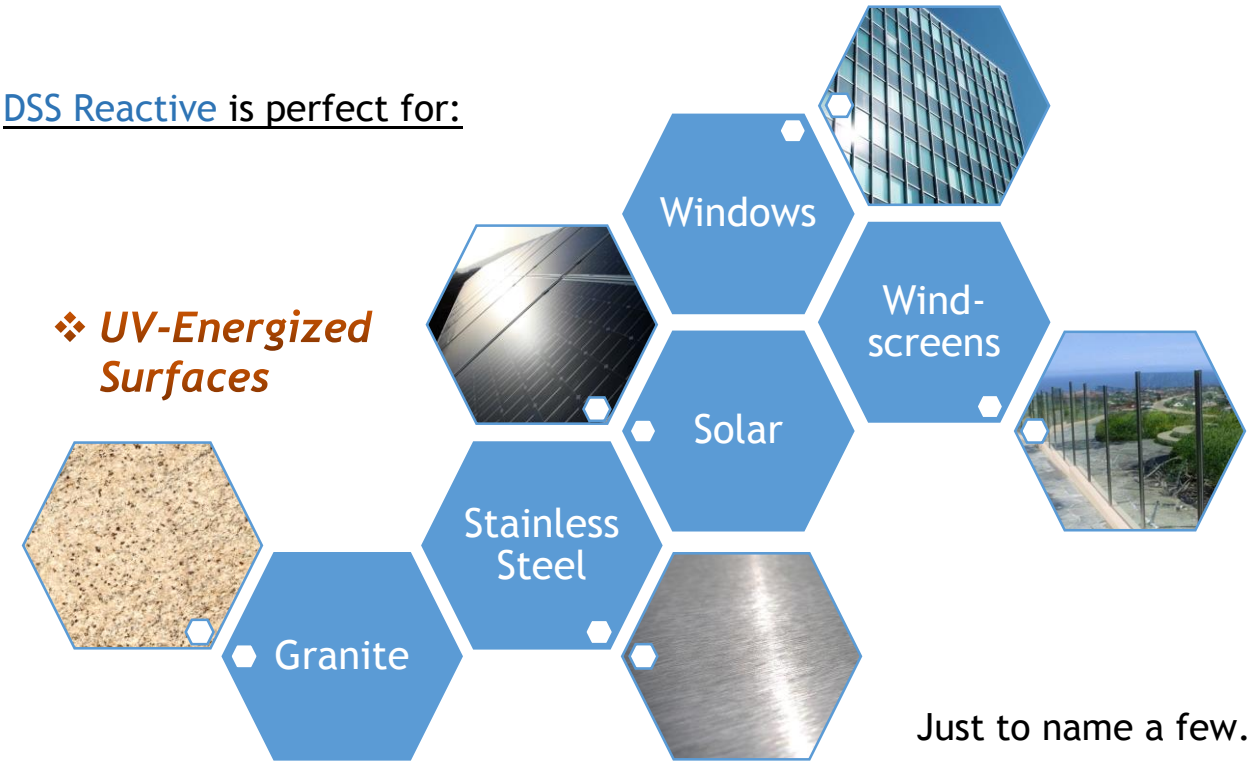
- Comes with a limited lifetime warranty.
- Easy, safe application.

Application Procedures:

1. Use the Diamond Prep to remove any oils and dirt.
2. Diamond Luster restoration cream may be used to remove hard-water stain corrosion if needed.
3. Apply the DSS Reactive coating using a microfiber applicator pad in a circular motion, ensuring complete coverage. Do not over apply. A second coat may be used if desired.
4. Buff off residual material.
5. Maintain with the DSS Shammy or microfiber cloth and DSS Reactive Care Plus to ensure optimum coating longevity.

DSS Reactive is perfect for:

❖ ***UV-Energized Surfaces***



Just to name a few.

Cleaner longer, more brilliant, scratch resistant and easy to maintain….
The very best in science.
